

```
// JSX
let ProductCard = <div className="card">
  <h2>{product.getName()}</h2>
  <p>Price: {product.getPrice()}</p>
</div>
```

```
{tag: 'div', props: {...}} 1
  props:
    children: Array(2)
    0:
      props:
        children: ['iPhone 16']
        [[Prototype]]: Object
        tag: "h2"
      [[Prototype]]: Object
    1:
      props:
        children: (2) ['Price: ', 89000]
        [[Prototype]]: Object
        tag: "p"
```

Type of Query	0 Matches	1 Match	>1 Matches	Retry (Async/Await)
Single Element				
<code>getBy...</code>	Throw error	Return element	Throw error	No
<code>queryBy...</code>	Return <code>null</code>	Return element	Throw error	No
<code>findBy...</code>	Throw error	Return element	Throw error	Yes
Multiple Elements				
<code>getAllBy...</code>	Throw error	Return array	Return array	No
<code>queryAllBy...</code>	Return <code>[]</code>	Return array	Return array	No
<code>findAllBy...</code>	Throw error	Return array	Return array	Yes
